DevOps / Cloud: Git, GitHub, Docker, Kubernetes, Terraform, Linux, AWS

Concepts: Data Structures & Algorithms, OOPs

PROJECTS

Shopping App (FashionStore)

- Developed a fully responsive and user-friendly shopping website using React.js, HTML, CSS, and JavaScript.
- Implemented dynamic product listings, intuitive navigation, and seamless browsing experience.
- Managed source code using Git and GitHub, following clean code practices.
- Designed the application with scalability and modern UI principles in mind.

Project Link: <https://github.com/ArpitKapkar/Shoping-site.git>

Weather Application

- Built a dynamic weather application using HTML, CSS, and JavaScript with real-time API integration.
- Displayed current weather conditions, forecasts, and location-based updates.
- Implemented responsive design and efficient API data handling.
- Strengthened frontend development and API integration skills.
